Service Stations, Lifts and more

Distribution Partner

Over 35 partners in Germany
Over 100 partners in Europe

Head Office in Germany

Over 50 employees responsible for sales, product
management, marketing & service

X-431 Series

Diagnostic Tools for Professional Workshops

With over 20 years of experience, LAUNCH is one of the leading manufacturers in professional vehicle diagnostics with the X-431 being our flagship series. Our smart X-431 Series workshop tablets have a wide vehicle coverage paired with high test depth. The X-431 app offers you weekly updates and guarantees a constantly growing diagnostic scope.

Intuitive Operation

The clear menu structure of our diagnostic app guides every user quickly to their destination. All steps are conveniently completed through a touch screen with one-finger operation. A modern Android operating system ensures a smooth program flow.

ADAS Calibration

After replacing a windscreen or bodywork, the sensors of the Advanced driver assistance systems often have to be recalibrated. Adapted to our new calibration set X-431 ADAS PRO, you now have the possibility to recalibrate the lane departure warning system, Vehicle-interval radar or the rear view camera with our diagnostic software.

Automatic Vehicle Recognition

With intelligent diagnostics, you can identify vehicles without having to select a manufacturer beforehand. With our specially developed VIN decoding process, our diagnostic app recognises the vehicle manufacturer or model automatically. A manual type selection is no longer necessary.

Updates at Fair Prices

With your X-431 workshop tablet, you will always automatically receive an update package without any further contractual obligation. You can always purchase your updates according to your personal needs, even if you haven't updated it for some time.

Recording and Playback of the Parameters

Our integrated recording function helps with sporadic errors that only occur under certain driving conditions. All marked parameters of a control unit can be stored over a longer period with a single click. Due to the integrated playback function it can be used for immediate evaluation.

Supports During Fault Diagnostics and Service Work

Our extensive LAUNCH CarSET Database supports you in all workshop work. Whether it's guided fault diagnosis with circuit diagrams, repair data or torque values. Thanks to our permanent maintenance you are always up to date and also informed about current manufacturer recall actions.

Freeze Frame

Check the parameters and time after a stored error occurs. Most manufacturers currently store all information such as temperature, speed, velocity and time in the event memory of a control unit.

Intelligent Diagnosis Assistant (IDA)

The new intelligent diagnostic assistant (IDA) from LAUNCH powered by WalkMe helps you to learn diagnostic processes and functions more quickly.

Maintenance Menu of Relevant Service Functions

In our maintenance menu, a service interval can be reset with a few clicks, new batteries can be relearned or a throttle valve can be reset. This is supported by an automatic vehicle identification and simple menu navigation, which brings every user to his goal quickly.

Cloud Print

The LAUNCH Cloud Print platform is an online database and offers the possibility to store and print all diagnostic reports of a registered LAUNCH X-431 diagnostic device online. With the help of the cloud print platform, it is now easily possible to provide the customer with a diagnostic report without having the diagnostic device in place. Departments that deal with invoicing or customer support benefit from this new possibility of location-independent data retrieval.

Wide Vehicle Coverage for Maximal Diagnostics

Whether common vehicles or luxury cars, with the X-431 Series you can handle a wide range of your customer's fleet, from VW Golf to Porsche Cayenne. Especially vehicle models from Far Eastern manufacturers such as Honda, Kia, Nissan, Toyota or even Lexus.

X-431 EURO TAB III Combi Diagnostic Solution

The X-431 EURO TAB III, based on Android 9 system, is the latest addition to our X-431 Series and the newest high-end vehicle diagnostic device that has been developed by LAUNCH. It passes on all technology and diagnostic advantages from the previous X-431 EURO TAB II model, such as wide car model coverage, powerful test functions, multiple special functions, accurate test data, as well as 6 new service functions and more. It comes with Smartlink C as an equipped standard VCI, supported with LAUNCH Super Remote Diagnosis System (SRDS).

Service Functions

Remote Diagnostic

Over time modern vehicles are being equipped with increasingly more electric systems, which make the diagnosis for independent workshops without OEM Diagnosis Software more difficult. Remote diagnostic is the solution for this problem. By using the SmartLink C device, a well-trained diagnostic technician can remotely connect to the car using the PassThru function and can then provide an OE-Level diagnosis including troubleshooting, coding and special functions.

All that is needed is a SmartLink C device connected to the internet and the vehicle. As soon as these requirements are met, the SmartLink C device will enter the "Remote Diagnostic Mode" which will connect you directly to a professional remote diagnostic technician. You can then easily request required services. If needed you can also extend the Remote Diagnostic software to heavy duty vehicles (HD) and trucks to access more powerful and additional diagnostic possibilities on OE-Level.

X-431 IMMO PAD Vehicle Key Programming

The X-431 IMMO PAD, based on Android 7.1 system, is a new 10 inch vehicle key programming device developed by LAUNCH. It is equipped with a powerful hardware as well as anti-theft solutions for locksmiths and car repair shops. The X-431 IMMO PAD supports vehicle key, engine / gearbox programming and offers powerful reprogramming of multiple parts. In addition, it passes on LAUNCH's advantages in diagnostic technology, such as wide car model coverage, powerful diagnostic function, many special functions and accurate test data.

- Software Updates Included**
- Remote Control Matching**
- Key Chip Read & Write**
- Anti-Theft Password Reading and Replacement**
- Anti-Theft Type Identification**
- Remote (optional license) and Local Diagnosis**

X-431 IMMO PRO Vehicle Key Programming

X-431 IMMO PRO, based on Android 10 system, is a new 8 inch vehicle key programming device developed by LAUNCH. It provides powerful anti-theft solution to locksmiths and car repair shops. It supports vehicle key, engine and gear box programming, featuring powerful multiple parts reprogramming and wide range of vehicle coverage. Compared to the LAUNCH IMMO PAD, it offers only a superficial diagnostic function like read out & delete fault codes and read out parameters. It passes on LAUNCH's advantages in diagnostic technology, such as wide vehicle model coverage and accurate test data. The user-friendly interface increases efficiency of daily work. The X-431 IMMO PRO is the perfect combination of a powerful key programmer and a high-end automotive diagnostic device.

X-PROG 3

Security Gateway

With the EU Regulation 2018/858 coming into effect, more and more vehicle manufacturers have started to protect access to the vehicle electronics via the OBD interface using so-called security gateway modules. This affects the previously unrestricted communication between the vehicle diagnostic device and the respective vehicle. LAUNCH Europe GmbH currently offers SGW activation for FIAT Chrysler Automobiles and Renault / Dacia models to enable activation and thus full access to all diagnostic functions again.

Advantages Security Gateway

Unrestricted Diagnosis

With a LAUNCH SGW activation card, it is possible to regain full access to the vehicle's control units and on-board electronics.

Special Functions Available

With the purchase and registration of a Security Gateway licence for a LAUNCH X-431 diagnostic device, you will still have access to special functions such as coding and programming.

Quick and Easy Access

You can order your SGW activation quickly, easily and conveniently via our sales partners. We currently offer SGW activation for FIAT Chrysler Automobiles and Renault / Dacia models.

FIAT

FIAT CHRYSLER AUTOMOBILES

RENAULT

Within the framework of a cooperation agreement with the FCA Group, Renault / Dacia, Mercedes and Maserati LAUNCH Europe GmbH enables the SGW activation of all vehicle models equipped with the Security Gateway technology. In this way, unrestricted vehicle communication between the vehicle diagnostic device and the vehicle can be realised again and all diagnostic functions can be fully used.

Intelligent Diagnostic Assistant IDA

LAUNCH Europe has now implemented the new Intelligent Diagnostic Assistant IDA on the latest X-431 diagnostic devices. IDA is a program that will explain and guide you through your LAUNCH X-431 diagnostic tool. It will show you the high diagnostic performance of the tool and how to use it.

IDA Advantages

Diagnostic Onboarding / Training

With tutorials, training courses, technical information and a basic diagnostic function support, IDA is programmed to introduce the functionality of LAUNCH X-431 devices. IDA offers a guided tour through the system and shows an overview of the main settings and functions.

Diagnostic Support / Technical Solutions

Step by step video content of the main features and service functions will be implemented into the system. In future LAUNCH Europe will develop the diagnostic assistant IDA to offer a reliable and professional solution for various diagnostic problems.

News / Software Updates and Feedback

Updates, news and other informations will also be announced by the system.

Vision

LAUNCH Europe will continuously develop and improve the performance of IDA. Step by step we will implement various informations and training modules into our system to support all technicians.

Cread@r PROFESSIONAL MOT IV

Semi-Professional Diagnostic

The CRP MOT IV is a further development of the MOT III especially for Europe. With its new hardware and diagnostic functions, it is the ideal entry-level unit for diagnostic work or as a second device in the workshop. New diagnostic options of the CRP MOT IV such as 31 powerful service functions, actuator test and much more. Includes the new DBScar VII VCI with more protocols and a more stable connection.

Features

- Software Updates Included**
- Battery Tester and Videoscope**
- Wide Vehicle Model Coverage**

Creader PROFESSIONAL 129 EVO

Semi-Professional Diagnostic

The Creader Professional 129 EVO is an entry level device for car diagnostics, which is based on an Android operating system. It can read and clear the error memory as well as the basic diagnostic functions of the four basic systems: engine, automatic transmission, ABS and SRS. In addition, the Creader Professional 129 EVO also has the most frequently used service reset functions, such as resetting oil service, electronic parking brake, battery reset and more. Since a functional update in late 2022, TPMS reset was added as a new service function.

CarSET and TruckSET Database

CarSET Electronics, PRO, Ultimate

The **Electronics Package** is our basic package that helps your technicians identify, locate and fix faults in electrical systems and components.

The **CarSET PRO** database provides instant access to a wide range of technical service bulletins (TSBs), as well as linking to fault codes and related case descriptions in original equipment manufacturer (OEM) quality. In addition, it contains tried-and-tested problem solutions and tips as well as a guided vehicle diagnosis. The CarSET PRO package also already includes the Electronics package

The **CarSET Ultimate** database is the complete package for your professional workshop! It helps technicians reduce the time needed to fix common faults and includes OEM Technical Service Bulletins (TSBs) and recalls. The Ultimate Package consists of the Electronics Package, the Smart Package and additionally the Tech Package.

TruckSET Electronics, Business, Ultimate

The **Electronics Package** is our basic equipment and helps your technicians to identify, locate and rectify faults in electrical systems and components.

The **TruckSET Business** database provides a direct path to OEM-based technical data for over 10 truck brands and over 20 trailer manufacturers. All these technical information in the database can help technicians to detect, to find and to solve various kinds of problems.

The **TruckSET Ultimate** is the complete package for your professional workshop! This package contains comprehensive information on identification, repair and maintenance, which will help your technicians to reduce the time needed to rectify common faults.

X-431 Diagnosis

Accessories

HD Box 3

The new LAUNCH HD Box 3 is the perfect expansion module for users of the X-431 EURO PRO 4 and X-431 EURO PRO 5. Trucks, buses and commercial vehicles from over 20 manufacturers are covered. Communication is established via Bluetooth or by cable and supports 12 V and 24 V on-board voltage.

 Operating Voltage DC 9 - 36 V	 Test Voltage DC 12 V	 Power Input ≤ 3 W	 Working Temp. - 10° C – 50° C	 Wi-Fi	 USB	 Bluetooth	 Dimensions [mm] 264 × 210 × 30
 Supports over 20 Manufacturers	 Online Update	 ABS Control Unit					
 Time Maintenance	 Transmission Reset	 Engine Reset	 Retarder Reset	 Oil Reset	 AdBlue Status/ Consumption	 Vehicle Speed Limit	 Vehicle Rotational Speed

HD Pack

HD Pack for X-431 EURO TAB II and EURO TAB III consists of activation code for HD Software and non-standard HD cables. The Smartbox 3.0 which comes with the X-431 EURO TAB II / TAB III is compatible with both 12 V and 24 V.

Motorcycle Software + 6 Connectors

Coverage Manufacturer: Honda, Yamaha, Kawasaki, Suzuki, Harley-Davidson, BMW
Supported device*: X-431 EURO TAB III, EURO TAB II, EURO LINK, EURO PRO5 serial, EURO PRO4 serial, EURO TURBO

X-PROG 3

The X-PROG 3 key and immobiliser programmer is a powerful anti-theft solution and an ideal choice for professional repair shops and vehicle maintenance businesses. X-PROG 3 is an integrated multi-function module, which offers multiple functions in one device for fast and accurate reading and writing of data.

 Interface DB26, DB15	 Input Voltage DC 12 V	 Input Current 500 mA	 Working Temp. 0 – 50 °C	 Storage Temp. - 20 – 70 °C	 Dimensions [mm] 39 × 107 × 298	 Auto-Theft Type Identification	 Remote Control Matching
 Key Chip Read & Write	 Anti-Theft Password Reading	 Anti-Theft Component Replacement					

O2-2 ScopeBox

Turn your X-431 EURO TAB III into a 4-channel oscilloscope with the help of the LAUNCH O2-2 ScopeBox. The ScopeBox captures faulty / irregular signals for curve analysis on the screen of the X-431 EURO TAB II/ TAB III. This analysis can be used to detect various defects, e.g. in sensors, actuators and circuits.

 1 GB for 4 Channels	 DC Accuracy ± 3 %	 Bandwidth 100 MHz	 Rise Time ± 3,5 ns (typical)	 Sampling Rate 1 GB for 4 Channels	 Input Impedance 1 MΩ ± 1,5 %	 Memory Depth 50 MB for 4 Channels	 Vertical Resolution 8 bit
 Vertical Scale 5 mV ~ 10 V	 Vertical Offset Range ± 2,5 V ± 120 V	 Invert Support	 Coupling DC, AC	 Time Base 50 ns – 1 ks	 Time Base Precision 20 ppm	 Automatic Measurement 23 Modes	 Powerful Trigger Function

S2-2 Sensorbox

The S2-2 Sensorbox is specially designed for the diagnosis and simulation of sensor faults. It mainly contains “Sensor”, “Actuator”, “Defined / Draw”, “Timing Waveform” and “Multimeter”. The module cannot be used separately, but must be operated together with LAUNCH-specific diagnostic tools that are compatible with this module.

 2 Channels	 Accuracy ± 1 %	 Amplitude Range 0 V – 20 V	 Max. Current Output 20 mA	 Frequency Range 0 – 20 kHz	 Square Wave Signal 0 – 15 kHz	 Duty cycle 0 - 100 %	 Power Supply Max. 20 mA
 Fixed Frequency Simulation	 Predefined Wave Simulation	 Predefined Frequency Range	 2 Signal Generator Interfaces	 External Power Supply	 1 x Magnetic Interface	 2 x Multimeter Interfaces	 Operating Temp. 0°C – 50°C

BST-360 Battery Tester

The LAUNCH BST-360 is a Bluetooth Battery Tester suitable for both technicians and end users. It has an advanced conductance test function that measures the exact cold start current capacity of the vehicle battery to provide meaningful results. It also provides a battery condition indicator and an overall indicator for the vehicle's starting and charging system.

 Compact Size	 Multi Terminal Support	 Automatic Bluetooth	 Battery Types Lead-Acid, AGM, GEL	 Print Report	 Multilingual	 Tests during each battery status	
 Electric Current Test	 Voltage Test	 Ripple Detection	 Starter Test	 Charging System Test	 Battery Test		

VSP-600 USB Videoscope

The LAUNCH video endoscope is the ideal tool for viewing and capturing video and images in hard-to-reach areas of your vehicle. Equipped with a 5,5 mm small and fluid-resistant camera head and adjustable LED illumination.

 Diameter 5,5 mm	 Resolution 1.280 × 720 px	 Temperature -10°C – 55°C	 Sensor Size 1/9"	 USB Type C micro USB	 Power 5 V	 LED 5 Level	 Cable 4,8 Ø, L 800 mm
 Fast Video and Image Recording	 Viewing and Saving Images and Videos	 Automatic White Balance					

X-431 TSGUN

The X-431 TSGUN is a professional TPMS module with integrated sensor activation, reading, programming and teach-in function. It reads information such as tyre pressure or temperature by receiving signals with different frequencies.

 TPMS-Function 433 MHz	 Tech-In Process Through OBD Interface	 ID Generator automatic or manual	 Supports 98% of all Models	 Reads Tyre Pressure Data	 ID Sensor read, copy and write	 Vehicle-specific description of the teach-in process	 Supports Reprogramming

Diagnostic Standalone Devices

Pro Trolley TWT-100

TWT-100 is new professional multi-function trolley for diagnosis devices, battery chargers, oscilloscope, and much more. Ideal to be used in the workshop during the vehicle's ECU reprogramming in combination with the LAUNCH Flashpower product. It provides the convenience and flexibility for the daily work in a workshop.

Dimensions 1.300 × 670 × 610 mm	Weight 71 kg	Ideal for Workshops	In Combination with Control Units				

Trolley

Professional multifunction trolley for battery chargers, diagnostic equipment and much more. Ideal for use in the workshop, when programming control units on the vehicle, for example in combination with the new Flashpower 120. The multifunction trolley offers convenience and flexibility for daily work in the workshop.

Dimensions 1.120 × 560 × 540 mm	Weight 25,5 kg	Ideal for Workshops	In Combination with Control Units				

Flashpower 120

Flashpower 120 is a high-performance battery charger with compact dimensions. It is suitable for use in workshops, by vehicle electronics technicians and car dealers for charging car batteries and ensuring the power supply for all types of programming, flashing and vehicle diagnostics.

Voltage 90 – 260 V	Power 1.800 W	Output Voltage 12 V	Charging Current 10 – 120 A	Battery Selection Wet-Cell Battery	Charge Capacity 10 – 1.200 Ah	Maintenance Capacity 10 – 3.600 Ah	Cable Length 2,7 m / 6 m
Dimensions [mm] 350 × 450 × 150	Weight 2,7 m – 8,5 kg						

PFP-100

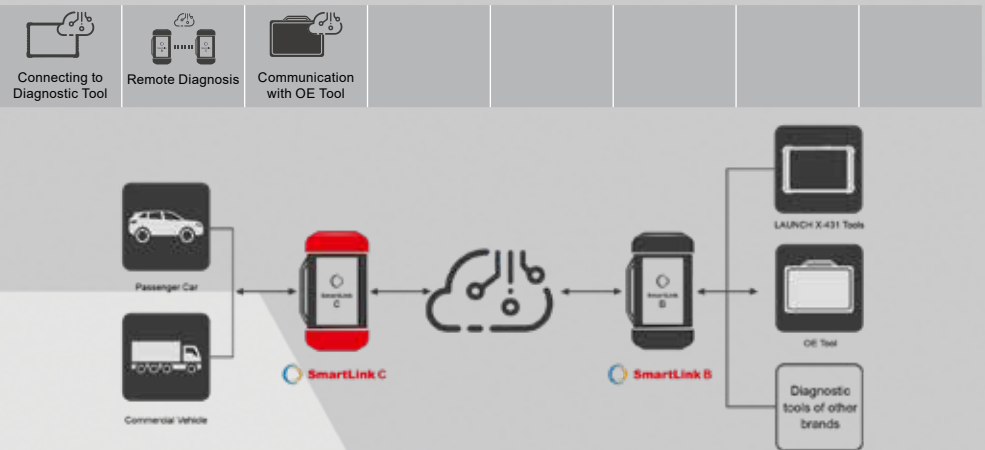

PFP-100 is a professional 100 Ampere vehicle battery power support unit with high-performance, compact size and high-quality. It is used by garages, car electricians and car dealerships, mainly for supplying continuous power to the vehicles battery, during all stages of ECU reprogramming and flashing, according to the request of car OEMs.

Voltage 110 – 220 V	Power 1.200 W	Output Voltage 12 V	Charging Current 2 - 16 V / 2 - 100 A	Battery Selection Regular, AGM, GEL	Charge Capacity 10 – 1.200 Ah	Maintenance Capacity 10 – 3.600 Ah	Cable Length 3 m
Dimensions [mm] 430 × 350 × 140	Weight 7,7 kg						

SRDs SmartLink B

SRDs is comprised with SmartLink C, SmartLink B and a Cloud Platform. The SmartLink C can be connected to the vehicle, while the SmartLink B can be connected with any diagnostic device. The remote diagnosis will be carried out on the SmartLink platform.

SRDs SmartLink C

Supports passenger and Commercial Vehicle	Remote Diagnosis	Compatible with DoIP	PassThru J2534, D-PDU, RP-1210	Local Diagnosis			

BST-860

The new BST-860 battery tester with integrated thermal printer is the ideal solution for testing 12 V batteries and their associated electrical systems.

Display LCD Display	Measuring Cable 80 cm	Working Temperature - 18 up to 50° C	Dimensions 188 × 95 × 41 mm	Weight 450 g	Supports Wide Vehicle Range	Battery Test Results	Multilingual

VSP-808 Videoscope

The VSP-808 is a professional video endoscope that displays a real-time view of the vehicle's internal structure on a 4.3" TFT display and stores images. The visible pre- and post-inspection process greatly improves customer satisfaction.

Display 4,3" TFT	Battery 1.800 mAh	Resolution Probe 1.280 × 720 px	Sensor Size Probe 2,8 mm	Frame Rate Probe 30 FSP	Focus Frequency Probe 3 - 300 mm	Cable Length 1.000 mm	Memory 8 MB
Probe Ø 5,5 mm	Cable Ø 4,8 mm	Operating Temp. -20°C – 60°C					

CRT-511 S

The CRT-511 S is a semi-professional TPMS diagnostic device that can activate, read, learn and program TPMS sensors. The CRT-511 S can activate and read tyre pressure sensor information via radio. It uses the OBDII interface to reset the TPMS module and program the sensor via a frequency of 433 MHz.

TPMS Function 433 MHz	Programming of up to 8 Sensors Simultaneously	Tire ID Matching & Learning via OBD Port	VIN Query	Supports 98% of all Models	Reads Tyre Pressure Data	Sensor ID Read, Copy, Write	Knowledge Base
Supports Reprogramming	ID Generation Automatic or Manual	OBD II ID Generation Automatic or Manual	Free Software Update	12 Service Functions	OE Inquiry	TPMS Report	Wi-Fi 2.412 - 2472 MHz
